Jack Speidel

Software Developer

speideljackson@pm.me | +1 (818) 426-4134 | @jackspeidel | @jackspeidel

Professional Summary

Full-stack developer with experience building reliable, scalable systems in fast-paced environments. Skilled at refactoring legacy codebases into modular ones and shipping frontend features that drive user adoption, with a knack for working directly with users to understand what they actually need. Grounded in software architecture and design fundamentals, with a keen eye on emerging technologies. Seeking a role where I can plumb technical depths while staying close to the customer and the product.

Language Proficiencies

Expert

C#, JavaScript/TypeScript

Advanced

React

Experience

Riverside Transport Inc. — Delray Beach, FL (Remote)

Software Developer — March 2025 - Present

- Designed and built in-house bidding platform enabling Operations team to submit competitive offers on loads with automated provider callback handling and response management
- Architected and expanded booking software from single-provider tool into fully-integrated load management platform; directly responsible for changes that impact operational efficiency and transaction workflows
- Own architecture and ongoing development of revenue-generating platform; design all new features with distributed systems principles and modular architecture to ensure reliability, scalability and maintainability

Junior Developer — November 2023 - March 2025

- Owned diverse range of projects across frontend and backend, including bug fixes, feature development, and one-off initiatives; rapidly built familiarity with company codebase and system architecture
- Developed C# proficiency on the job while delivering production code; demonstrated learning velocity across multiple tech stacks and domains

RT Specialty — Atlanta, GA

Production Associate — 2019-2021

- Specializing in Property lines

Vanguard — Scottsdale, AZ

Brokerage Investment Professional — 2017-2019
